Java Lab Program 7

Code:-

```
class Test {
    static <T> void genericDisplay (T element) {
        System.out.println (element.getClass().getName()
            + " = " + element);
    }

    public static void main (String [] args) {

        genericDisplay (11);
        genericDisplay ("Game");
        genericDisplay (1.0);
    }
}
```
